**SURF SKI MODEL RANGE**

Our surf skis are designed and manufactured at our factory on Queensland’s Sunshine Coast. We also have a factory in Perth, Western Australia. Our craft are used by many current World and Australian Lifesaving Champions. We export world wide.

<u>Model Code</u>	<u>Model Range</u>	<u>Model Description</u>
CD	18’ CD	This craft utilises the same fast, responsive hull shape as the SE, but we have customised it to produce a ski with a total lower volume. The CD variation of the SE is a suitable alternative for the smaller, lower weight paddler.
1618	16’ 18kg Compact Racer	A very manoeuvrable 16 foot ski built to 18kg minimum weight for surf racing in S.L.S.A. events. It has some great features including better stability, and is more user friendly in the wave zone. The compact is an ideal first ski particularly for those commencing their competitive racing career. It is available in an adjustable footwell version, which is a viable option for club purchase as an ideal training craft.
1616	16’ 16kg Compact Leisure	This craft is made to the same professional manufacturing standards as the Compact Racer but is finished to an approximate weight of 16kg. This is for the paddler who does not intend to compete in registered S.L.S.A. events. Built for surf, river or lake and suits most keen paddlers. Available with adjustable footwells.
FK	Molokai 100% Carbon	The “FK” Molokai is 20 foot (6 metres) long, weighs just 12.7kgs (28 lbs). This ski is constructed of 100% carbon fibre and has a light weight perforated foam core, which makes it a very fast running craft for open ocean racing. The end result is a light weight yet very stiff and robust racing ski.
MG	Molokai Standard Glass	The “MG” Molokai shares the same mould as the “FK”, giving it the exact same external dimensions. The MG Molokai is constructed of several different layers of fibreglass cloth designed to give a very durable craft with the same performance level as the full carbon FK. Expected finished weight is approx 14.5kg (32 lbs).
HD	Double	Our Double Racing Ski meets all the S.L.S.A. specifications. It comes standard with adjustable footwells front <u>and</u> back. This fast, tough craft, with low maintenance, will make a sound investment for many years.
